## *We are all change fatigued.*

We're sick of hearing about it, planning for it and dealing with the effects of it but that doesn't change the fact that change isn't going away anytime soon. Which means we can't just hold on tight and hope we make it through to the other side. There is no other side. Just more changes ahead.

## *So how do we make the most of it? How do we not just survive but thrive?*

How do we seize the opportunities that living through a revolution presents? Re-think our business models, un-think what worked before and out-think our own beliefs and behaviours?

## *How do we change how we approach change?*

In this fun and thought provoking presentation, Kieran Flanagan will explore why AGILITY is a skill we all need to develop in ourselves, our teams and our practices. Kieran will help you develop your cognitive elasticity and thinking habits that are more responsive and flexible. She will explore how we can all OUT-THINK the competition, our limitations and ourselves.

## *Specifically, she'll explain:*

- ◆ Why we need to seek right answers... plural!
- ◆ Why creativity is an ability to think, not draw.
- ◆ How agility over resilience facilitates a possibility mindset
- ◆ How to out-think for persuasiveness
- ◆ The importance of Impossible questions
- ◆ Why success isn't always a good thing
- ◆ How to combat conflict with possibility.
